P14 ventricular-like cardiomyocytes · 10,873 nuclei

Subcluster	Nuclei	Proposed state	Evidence / sensitivity status	Library 1 / 2 nuclei
P14_V0	2,763	Fgf14/Thsd4-enriched state	candidate/review	1,258 / 1,505
P14_V1	867	Uncharacterized ventricular state	candidate/review	448 / 419
P14_V2	3,735	Calcium/contractile program	candidate/review	1,670 / 2,065
P14_V3	3,508	Srl/Actn2-enriched structural program	replicate-supported; adjustment-sensitive	1,709 / 1,799

Identical coordinates and axis limits in both panels · Numeric groups are computational subclusters
Proposed states remain RNA-based interpretations; evidence and sensitivity status are listed above.
Library 1 / 2 order: GSM8827075_P14_1 / GSM8827076_P14_2
