
Direct RNA gene-module transfer · individual nuclei
Predeclared module definitions, both library directions; no winner selected on held-out results
Sprouting 6g
Unmeasured sprouting 5g
Proliferation 6g
Opposite-library Spearman
mean_log_expression
gene_balanced
rank_enrichment
P0
P7
P14
P21

P0 · same EC positions, three whole-module score definitions
Exploratory sprouting module; color stability alone is not biological validation
mean log expression
gene balanced
rank enrichment
Y (µm)
X (µm)
Inferred RNA module units; definition-specific

P7 · same EC positions, three whole-module score definitions
Exploratory sprouting module; color stability alone is not biological validation
mean log expression
gene balanced
rank enrichment
X (µm)
Y (µm)
Inferred RNA module units; definition-specific

P14 · same EC positions, three whole-module score definitions
Exploratory sprouting module; color stability alone is not biological validation
mean log expression
gene balanced
rank enrichment
Y (µm)
X (µm)
Inferred RNA module units; definition-specific

P21 · same EC positions, three whole-module score definitions
Exploratory sprouting module; color stability alone is not biological validation
mean log expression
gene balanced
rank enrichment
Y (µm)
X (µm)
Inferred RNA module units; definition-specific
