Non-CM identities alongside directly measured CM maturation
Darker cardiomyocytes have higher 21-gene scores; source colors show identity

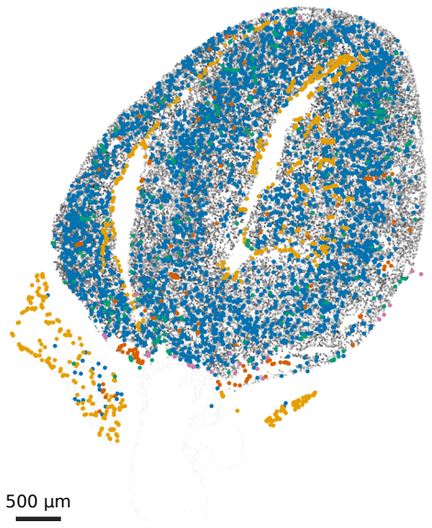

a P0 · endothelial subtypes

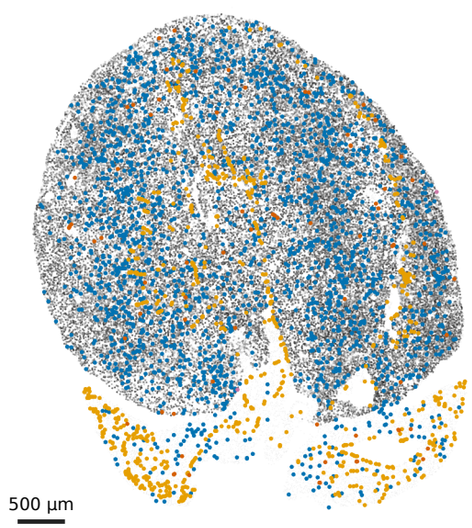

b P7 · endothelial subtypes

c P14 · endothelial subtypes

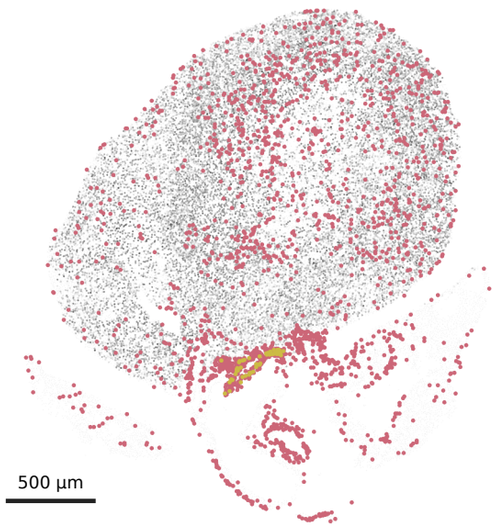

d P21 · endothelial subtypes

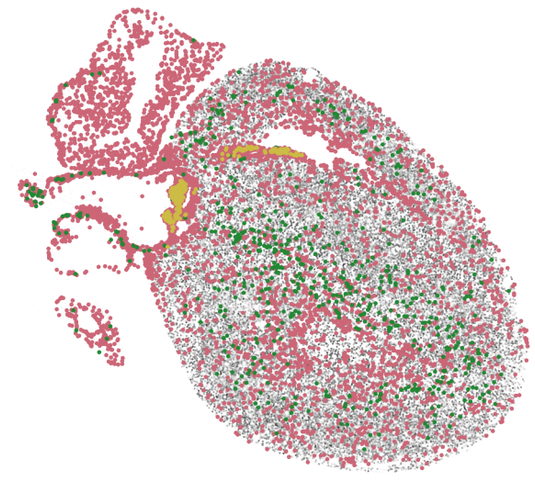

Capillary · Endocardial · Arterial · Venous · Lymphatic

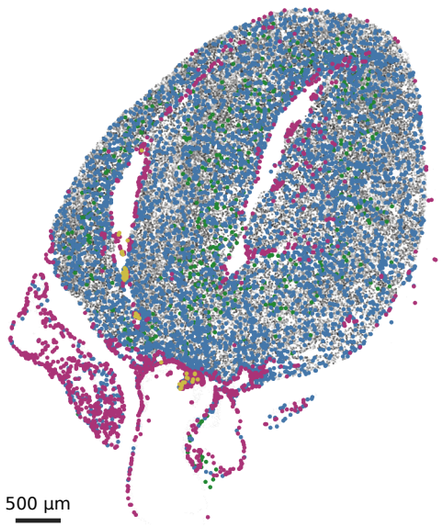

e P0 · fibroblast families

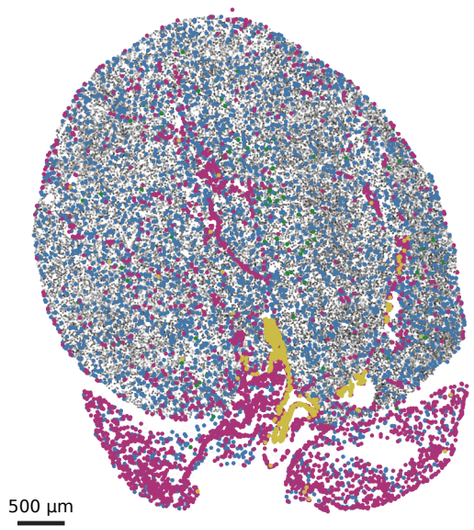

f P7 · fibroblast families

g P14 · fibroblast families

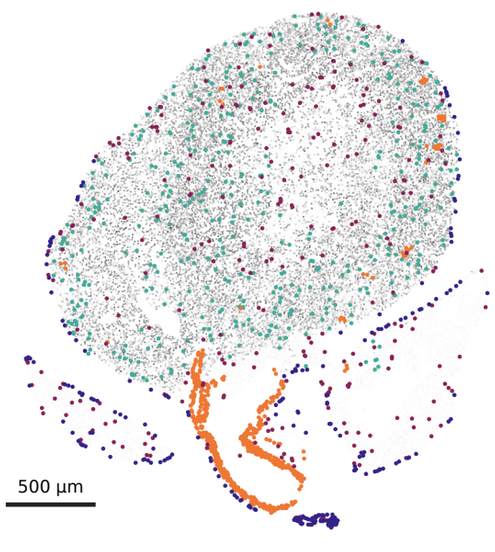

h P21 · fibroblast families

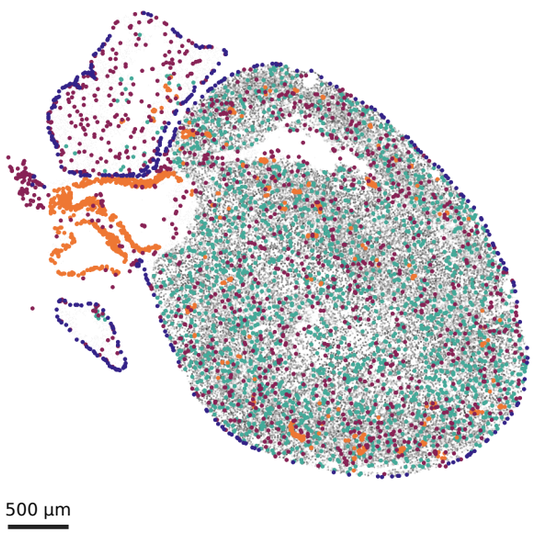

Postn · Gfpt2/Pi16 · Col8a1 · Lsamp · Kirrel3

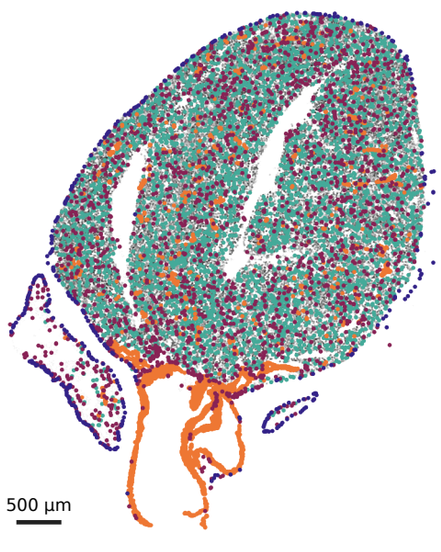

i P0 · other non-CMs

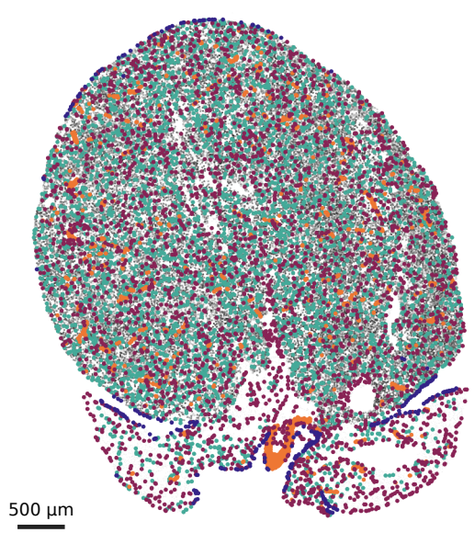

j P7 · other non-CMs

k P14 · other non-CMs

l P21 · other non-CMs

Pericyte · Smooth muscle · Immune · Epicardial
